

# nondesigns™

**NON LAYERS COLLECTION** - this series takes birch plywood and literally turns it sideways. Each layer is cut out on our computer controlled cutting table and then stacked to create the finished design. No glue is used in the process and furthermore, the layers are hollow, which makes the piece unexpectedly lightweight and strong. The chairs stack 4 high and the table's legs hinge in for transportation.

Baltic birch plywood, laquer finish, nickel plated hardware  
Available in natural, black and white finish. Custom colors are available upon request.
