NON TOPO TABLE - One of NON's first products, the TOPO TABLE now has a new edition with hardwood maple legs. TOPO is a series of Corian tables with built in, reconfigurable landscapes. Molded plastic inserts drop into the table to create functional topographies that make a home for plants, paper clips and oranges. TOPO uses rapid prototyping technology in a way that enables each table to be different. It's a very simple design but the process of ordering one is a lot of fun. Our customers get to color in the areas that they want the inserts to be placed and then the CNC cuts out the holes. The inserts sit in the holes and can be swapped out and rearranged.

Corian, maple, styrene

To customize a TOPO arrangement, color in the dotted areas where you would like TOPO inserts to be located and email or fax this form in to NONdesigns. info@nondesigns.com (626) 696-3081
